PROFESSIONAL EXPERIENCE

Co-Founder & COO and Head of Product - AI Platform

Sept 2024 – Present

Travel CarePlans (AI Healthcare Startup) | Vancouver, BC

- Owned full AI product roadmap in a co-lead model alongside ML engineers — defined the customer-facing experience (case submission, review workflows, preference capture) while ML team owned the model layer; maintained equal weight on product direction and model behaviour
- Shipped AI-powered features translating complex model behaviour into user-centered interactions; achieved **30% usability improvement** through iterative prototyping validated by direct user sessions
- Defined success metrics before every build - instrumented features with **Mixpanel** event tracking, built activation and retention funnels, and used usage data to guide sprint prioritisation
- Built and maintained a shared user insight library from regular clinician and patient interviews, referenced across the team for every roadmap decision
- Managed **\$2M+ regulated initiative** (HIPAA, PIPEDA, GDPR, ISO 27001) to **95%+ milestone completion**; owned competitive positioning and go-to-market strategy for the AI module

Chief Operating Officer- Growth & Digital Platform

Mar 2024 – Present

HEAL Academy (Healthcare EdTech Startup) | Vancouver, BC

- Owned PLG and self-serve product strategy for a healthcare education SaaS platform — defined activation metrics, optimised conversion funnels, and drove **300% improvement in customer acquisition** and **3× increase in qualified leads** within 6 months
- Built end-to-end **n8n** automation pipeline: Meta Lead Ads webhook → AI lead scoring → Claude API personalised outreach → multi-channel delivery (email, Messenger, SMS) → Notion CRM — replacing manual lead handling for a team of 15+
- Defined and tracked in-product growth metrics using **Mixpanel and HubSpot**; ran A/B tests on onboarding flows and activation sequences, using data to identify friction and iterate rapidly
- Nurtured and scaled a cross-functional team from 5 to 15+ members across technology, operations, and clinical domains; established sprint ceremonies, prioritisation frameworks (RICE/MoSCoW), and product delivery practices
- Launched across **5+ international markets** — managed multi-stakeholder product decisions balancing competing needs of learners, clinical educators, and compliance teams

PhD Researcher — Bioinformatics Platform

May 2019 – Feb 2024

BC Centre for Disease Control & University of British Columbia | Vancouver, BC

- Led product development for a provincial clinical data platform serving **50+ healthcare facilities and 5M+ population** — defined vision, owned stakeholder requirements, and drove delivery of automated data processing workflows with **40% efficiency improvement**
- Built AI/ML-adjacent pipelines (Python, R, SQL, Nextflow) processing **2,800+ datasets at 95%+ accuracy**; served as primary liaison between engineering and clinical end-users, translating model outputs into actionable insights for non-technical audiences
- Operated in a high-ambiguity, multi-stakeholder environment — aligned government agencies, clinical lab directors, and research scientists on competing priorities while maintaining delivery cadence
- Established data quality frameworks, reproducibility standards, and audit trails for regulated clinical reporting; experience directly applicable to validated AI workflows in healthtech

AI & AUTOMATION TECH STACK

Product & Engineering: Jira (sprint tracking, RICE/MoSCoW backlogs, epic roadmaps), Notion (PRDs, CRM, OKRs, knowledge base), GitHub (PR review, release tracking), Postman (API testing, webhook debugging), Loom (async PRD walkthroughs, sprint demos)

Analytics & Metrics: Mixpanel (event tracking, funnel analysis, cohort studies, retention), HubSpot, Grafana (launch dashboards, real-time monitoring), Google Analytics, SQL + Python (custom cohort queries, ad-hoc analysis), R (A/B test significance, regression)

Automation & Operations: n8n (multi-phase marketing automation, webhook pipelines, AI assistant workflows), Zapier (lightweight point-to-point integrations), Meta Graph API (Lead Ads webhook → CRM), Twilio (SMS), Messenger API

Experimentation: Google Optimize (A/B - +46% conversion lift), Optimizely (form tests - +63% completion), Launch-Darkly (feature flags, percentage rollouts, kill switches, beta access management)

User Research & In-Product: Dovetail (centralised insight repository, tagged research synthesis), Pendo (in-product tooltips, NPS, onboarding checklists, usage analytics), Zoom (25+ moderated usability sessions), Figma + Miro (prototypes, journey mapping, workshops)

EDUCATION

PhD in Bioinformatics (Withdrawn, Grade: A-) <i>University of British Columbia, Vancouver, BC</i>	NSERC-CREATE Bioinformatics Scholar ; Faculty of Science Graduate Award	2019 – 2023
MSc in Molecular Biology (Grade: A-) <i>University of Skövde, Sweden</i>		2016 – 2018
MTech in Biotechnology (GPA: 9.2/10) <i>Dr. D.Y. Patil Biotechnology & Bioinformatics Institute, India</i>		2012 – 2017
